

HATTIESBURG CLINIC HISTORY

Hattiesburg Clinic (the “Clinic”) is a multi-specialty medical clinic providing physician services and outpatient diagnostic and treatment services throughout southeast Mississippi. Since its founding on May 1, 1963, with only 10 physicians, the Clinic has grown to become the largest multi-specialty medical clinic in South Mississippi and has contributed significantly to the improvement of health care for residents. That focus on patient care has remained at the core of the Clinic’s mission and purpose throughout the decades.

Hattiesburg Clinic was incorporated in the early 1970's. Over the last six decades, the clinic has added countless specialties and ancillary services, as well as expand its locations to cover a 17-county footprint in South Mississippi.

The Clinic has continued to grow throughout the decades. We continue to add specialties, services, physicians and staff, and establish other satellite clinics in other communities for patient care and convenience.
